INTRODUCTION

To meet the need and requirements of the society and order to enhance the quality and standards of education syllabus are regularly updated. B.SC. /M.SC. Mathematics programs we included core course and optional papers. The teaching program is expected to be supplemented by tutorials, seminar and PPTs.

It is recommended that each paper further divided into five units in B.SC. and four units in M.Sc. and question from each unit be asked so as to ensure the student has actually studied all the topics. In order to test the grasp of the underlining principles of the various topics, very short answer type questions, short answers and long answer type questions covering the entire syllabus will be asked. There will be theory and internal examination in B.Sc. Program with 90% Weightage of marks in Theory Exam and 10% Weightage of marks in internal Exam

OBJECTIVE

1. A student should be able to understand the proof technique in Mathematics and its importance.
2. A student should acquire sufficient technical competence to solve the problems of varying difficulties levels.
3. A student should acquire communication skill to present technical Mathematics so as takes up career into Teaching/research in Mathematics and other various level competition exams like UPSC, PSC, etc.
